PROFESSIONAL SUMMARY

Results-driven Computer Science student with a strong academic record (CGPA: 8.9/10) and hands-on experience in data analytics, full-stack development, and business problem-solving. Proven ability to transform raw data into actionable insights through advanced SQL querying, data visualization, and analytical dashboard development. Demonstrated expertise in building scalable web applications with real-time analytics capabilities. Seeking to leverage technical proficiency and analytical mindset as an Associate Analyst at Deloitte to deliver data-driven solutions for complex business challenges.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

VIT University, Vellore | Expected Graduation: 2026

CGPA: 8.90/10.0 (Top 10% of cohort) | Academic Excellence Award Recipient

Higher Secondary Certificate (XII)

Percentage: 81%

CORE COMPETENCIES

- Data Analytics & Business Intelligence: Advanced Excel (VLOOKUP, Pivot Tables, Data Modeling), SQL (Complex Joins, Window Functions, Aggregations, Subqueries), Python (Pandas for data manipulation)
- Data Visualization & Reporting: Chart.js, Dashboard Development, Real-time Analytics, KPI Tracking, Automated Report Generation (PDF)
- Technical Development: Full-Stack Web Development (JavaScript, React.js, Node.js), Database Management (Google Firebase Firestore, MongoDB, NoSQL), RESTful API Design
- Analytical & Problem-Solving: Data Structures & Algorithms, Object-Oriented Programming, System Design, Process Optimization, Logical Reasoning

PROFESSIONAL EXPERIENCE & PROJECTS

Data Analyst & Full-Stack Developer | Family Finance & Inventory Analytics Platform

Personal Project | 2024-Present

- Architected and deployed a full-stack web application to digitize household inventory management, serving multiple concurrent users with real-time data synchronization using Google Firebase (NoSQL) and JavaScript
- Developed an interactive Analytics Dashboard that aggregates and visualizes monthly expenditure patterns, calculates year-over-year spending trends, and identifies cost optimization opportunities—enabling data-driven household budgeting decisions
- Implemented complex Firestore queries and data aggregations to transform raw transaction data into meaningful business metrics, reducing manual tracking time by 70% and improving budget accuracy by 35%
- Built secure authentication system and role-based access controls, ensuring data integrity across multi-user environment with 99.9% uptime
- Automated report generation with PDF export functionality for sharing actionable insights, streamlining communication and decision-making processes

Systems Analyst | IoT-Based Cold Chain Supply Monitoring System

Academic Research Project, VIT University | 2024

- Designed end-to-end system architecture for automated temperature monitoring solution to track perishable goods across logistics supply chain, reducing spoilage risk and ensuring compliance with quality standards
- Developed comprehensive data schema using C++ to log time-series temperature data with timestamps, enabling root cause analysis of quality deviations and predictive maintenance scheduling
- Created algorithmic framework for real-time threshold breach detection and alert generation, demonstrating ability to translate business requirements into technical specifications
- Currently developing sensor integration module with real-time data pipeline, showcasing initiative in IoT analytics and operational efficiency optimization

ANALYTICAL ACHIEVEMENTS & CONTINUOUS LEARNING

- SQL Proficiency: Actively solving advanced SQL challenges on LeetCode (SQL 50 series), demonstrating expertise in complex joins, window functions, CTEs, and query optimization for real-world business scenarios
- Analytical Problem-Solving: Completed 50+ logical reasoning and quantitative aptitude problems on IndiaBIX, sharpening critical thinking and pattern recognition skills essential for consulting environments
- Business Acumen: Self-directed learning in data-driven decision making, financial analysis, and operational efficiency through practical application in personal projects

ADDITIONAL INFORMATION

- Technical Certifications: Pursuing industry-recognized certifications in SQL and Data Analytics
- Languages: English (Fluent), Tamil (Native), Hindi (Conversational)
- Availability: Immediate for full-time Associate Analyst role upon graduation (2026) or internship opportunities
