Education

Nandha Engineering College **Sep 2021 - May 2025**

Bachelor of Engineering in Computer Science (B.E CSE) **CGPA:7.8**

Technical Skills

- **Data Analysis & Manipulation** : **SQL** (Joins, CTEs, Window Functions, Aggregate Functions, Query Optimization), **Python** (Pandas, NumPy), **Excel** (Power Query, XLOOKUP, Pivot Tables, Data Cleaning, Filtering & Sorting)
- **Data Visualization & Reporting** : Power BI (Interactive Dashboards & Reports, DAX, Custom Visuals), **Python** (Matplotlib, Seaborn), **Excel** (Charts & Conditional Formatting)
- **ETL & Data Processing** : Power Query (Power BI & Excel), ELT Processes, Data Transformation & Modeling
- **Statistical Analysis** : Descriptive Statistics (Mean, Median, Mode, Variance, Standard Deviation), Exploratory Data Analysis (EDA), Outlier Detection (Z-score, IQR)
- **Development Tools** : Jupyter Notebook, Git, GitHub

Work Experience

CubeAi Solutions Pvt Ltd **Apr 2025 - July 2025**

Data Analyst Intern Hybrid

- Managed daily HR-driven data analysis tasks with **100% on-time delivery**, ensuring high accuracy and clear progress reporting during regular team meetings.
- Engineered real-time business insights by cleaning and analyzing data (EDA) and building visual reports using Python, Excel, and SQL, boosting decision-making speed by **20%.**

Prepinsta Technologies **Dec 2023 - Jan 2024**

Data Analyst Intern | Python, Excel, Power BI, SQL Remote

- Deployed **8 data analysis projects**, leveraging Python, SQL, and Excel to streamline data cleaning and preprocessing, driving 20% improvement in project efficiency.

Projects

Strategic Analysis & Digital Roadmap: Diagnosing Profitability Gaps and Replicating Growth | Project Link **Sep 2025**

- **Quantified** crisis severity by analyzing **5 years** of data, **pinpointing 60%+** print circulation decline and a critical correlation: low Engagement Rate drove the lowest Profitability Index across three major cities.
- Modelled a targeted **1.2M reallocation** of marketing spend toward high-engagement zones to fund the new digital pilot and drive recovery. **Designed** the plan to **close the profitability gap** between top and bottom-tier operations.

Root Cause Analysis of IBM Churn Informing Retention Strategy | **Feb 2025**

- Evaluated **1,470+ employee** records using SQL to **identify 3 key risk factors driving attrition. Diagnosed** a critical correlation: employees with **low work-life balance (WLB score < 2)** were **2.5X more likely to leave.**
- Roles with **overtime had a 30% higher attrition rate** than others. Insights informed a **strategic $450K annual cost-saving** strategy focused on reducing churn in 2 high-risk departments. This strategy targets **40% of total turnover** via actionable BI .

Data Diagnostics on Global Terror Trends (1970–2017) using Python **Sep 2024**

- **Executed** comprehensive Exploratory Data Analysis (EDA) on the **Global Terrorism Database (1970-2017)** using **Python (Pandas/Numpy)**, processing **170,000+** records to diagnose threat profiles. Identified the top **10 terrorist groups** and **5 prevalent attack types**, generating **15+ data visualizations** for strategic intelligence reporting.
- **Quantified** a **65%** surge in global incidents between **2000–2017** and Model geographical risk, isolating high-impact zones where **80% of attacks** occurred in **20% of regions**. This analysis informed a data-driven risk assessment framework used to prioritize resource allocation and security planning.

Retail Performance Analysis from Walmart sales **Aug 2024**

- **Analyzed** over **300,000+ sales transactions** using **Advanced SQL** and analytical functions to **diagnose** key retail performance drivers. **Uncovered 5+ critical trends**, specifically quantifying the impact of external factors (e.g., holiday markdown weeks) on weekly sales and customer behaviour.

Relevant Coursework / Certifications

- Python for Data Science and Machine Learning Bootcamp - Udemy
- **Google Data Analytics** Professional Certificate - Coursera
